<i>Overall question</i> Build a well running “adjudication factory”: Which procedures really address current needs and are truly effective? Which alternatives are out there? How can you develop smarter procedures? How do you build a smart and well-running court organisation around these processes?	<i>Overall question</i> Use technology wisely: How can you bring your procedures online? How can you build your IT infrastructure in a clever way?	<i>Overall question</i> Have the means: Which innovative business models, revenue and financing solutions exist? Which suit your needs? What are the incentives you can work with? Are there new ways of financing dispute management?	<i>Overall question</i> Stay in touch with your stakeholders: How do you make sure you understand the needs of stakeholders? How do you inform them about what you are doing and about the results you produce? Should judges only speak through decisions? What are the special challenges for international courts?	<i>Overall question</i> Shaping courts: What does the current and future role of courts in society mean for the physical environment: building, attributes, etc...
